

Artiom Traciuc

Junior Frontend Developer | JavaScript | React

Profile

Junior Frontend Developer focused on building modern, responsive and user-friendly web applications. I have practical experience working with JavaScript, React, HTML5, CSS3, Vite and Tailwind CSS through personal and project-based development.

I have developed e-commerce websites and interactive web interfaces, working with reusable React components, responsive layouts, routing, UI elements and API-based functionality.

I am continuously improving my frontend development skills through practical projects, coding challenges and independent learning. I am looking for an opportunity to join a development team where I can contribute to real projects, learn from experienced developers and grow as a professional Frontend Developer.

Work Experience

Personal / Project-based Development

Sep 2025 - now

Front-End Developer

- Developed responsive e-commerce websites using React, JavaScript, HTML5 and CSS3.
- Created reusable components for navigation, product cards, sliders, categories and product pages.
- Implemented responsive layouts for desktop, tablet and mobile devices.
- Added product search, filtering and sorting functionality.
- Built product pages with images, prices, ratings, available sizes and colors.
- Used React Router for navigation between pages.
- Used Tailwind CSS to create modern and responsive interfaces.
- Worked with API and backend data integration.
- Organized projects using reusable and maintainable React components.

Web Development Projects

- Created interactive web interfaces based on design requirements.
- Practiced JavaScript logic, DOM manipulation and event handling.
- Developed responsive layouts using modern CSS techniques.
- Worked with Git and GitHub for project version control.
- Continuously improved code structure and frontend development practices.

Educational Background

Colegiu „Iulia Hasdeu”

2021 -2025
